INTRODUCTION

Dear Respected Colleague,

The WiMAX Forum continues to work with its Member Companies, Working Group Representatives, Board of Directors and industry representatives to increase awareness, support and advance Aeronautical Mobile Airport Communication System (AeroMACS), WiGRID, and the WiMAX technology.

This month, an Open Day on AeroMACS was organized by the SESAR project PJ14 EECNS (Essential and Efficient Communication Navigation and Surveillance Integrated Systems). The meeting was held at Leonardo’s premises in Firenze, Italy; it featured demonstration of developed prototypes, solution design, use cases and discussed the next stages.

The WiMAX Forum President Declan Byrne, delivered an AeroMACS presentation on the latest developments. Nikos Fistas presented EUROCONTROL’s involvement in AeroMACS and how it is important for aviation. Airtel, Leonardo and SESAR 2020 presentations were also highlighted at the meeting. For additional information and to review the presentations, please click here.

In the coming months, the WiMAX Forum will keep busy preparing for exciting meetings and events to raise awareness about the benefits of the WiMAX technology. Through events, speaking opportunities, and webinars, we are reaching out to diverse audiences in the WiMAX community about implementing and developing AeroMACS, WiGRID, and WiMAX networks in ways that will best serve all stakeholders. We will continue the pace throughout the year. Please stay tuned for more details and look for information on our upcoming events to be announced as of yet.

Please reach out to us if you have any questions or comments. We wish you all a great rest of the month and we hope to see you soon.

Best Regards,
WiMAX Forum
INDUSTRY SPOTLIGHT

The WiMAX Forum maintains a bustling schedule of public appearances, white paper publications, webinars, and press releases on behalf of our industry. Below you can find the most relevant activities and latest communications.

• AeroMACS Open Day

An open day on the Aeronautical Mobile Airport Communication System (AeroMACS) organised by the SESAR project PJ14 EECNS (Essential and Efficient Communication Navigation and Surveillance Integrated Systems). The workshop will present progress made on the PJ14-02-06 technological solution "Completion of AeroMACS." Hosted by partners, Leonardo, EUROCONTROL and Airtel, the open day will feature a demonstration of prototypes developed in the context of the solution.

For additional information, please click here.

EVENTS

In the coming months, the WiMAX Forum will host, participate, attend, and support events globally. We continue our efforts to bring you quality conferences hosted by the WiMAX Forum, and we will present and participate at key industry events. The WiMAX Forum team looks forward to seeing you at these events.

The WiMAX Forum plans to host and participate in other events over the course of the year. As details concerning these events are finalized, we will be certain to keep you informed. **For more information about our events, please visit: WiMAX Forum Events.**

**MEMBERSHIP SERVICES**

The **WiMAX Forum Membership** provides a wide range of **benefits and services** that promote growth and innovation of AeroMACS, WiGRID, and WiMAX technology.

**The WiMAX Forum would like to extend a special welcome to the new members since 2017:**

- Austro Control
- CBI Industries, Inc.
Comodo CA
Eonti
GAL Air Navigation Services (GALANS)
Jezetek

Only WiMAX Forum Members can certify products to guarantee interoperability and standard compliance for AeroMACS, WiGRID, and WiMAX; secure networks using Public Key Infrastructure (PKI) certificates; develop technical specifications; influence favorable regulatory environments; and contribute to the growth of the industry through standards development that satisfy the market needs, among other advantages.

The WiMAX Forum is committed to delivering the value necessary for our members to get the most from their membership, and we are always engaging with individual members to discuss how we can better serve them. If you are interested in speaking with our leadership team on our specific initiatives or have any questions, please send a message to Membership@wimaxforum.org.

The WiMAX Forum is the best place to access, leverage, and influence the growth and development of the AeroMACS, WiGRID, and WiMAX Technology. So be a leader and step up to get involved today!

WORKING GROUPS

The WiMAX Forum Working Groups are key to the development of WiMAX technology. The WiMAX Forum organizes its technical activities through a number of Working Groups that produce technical requirements, develop technical specifications, and advise the forum. Working Groups are chartered by the WiMAX Forum to bring together content experts from member companies to collaborate and contribute to specification development, harmonize documents, and perform other tasks that the WiMAX Forum has determined to be necessary or useful.

The Working Groups Working Groups are currently focused on AeroMACS, Smart Energy, and various spectrum access solutions. If you are interested in participating in our Working Groups, please contact us at info@WiMAXForum.org and we will be glad to speak with you about this opportunity. It is a crucial time for your organization to influence and leverage the Working Groups activities and contribute to the development of the market.

The Aviation Working Group (AWG) is working on three main technical activities: AeroMACS Product Certification, AeroMACS Public Key Infrastructure (PKI), and the FCC AeroMACS Petition for Rulemaking. The AeroMACS Designated Certification Laboratory (ADCL) has started Radio Conformance Testing (RCT) on a third set of AeroMACS System products. In parallel, the AWG Certification Task Group is validating test procedures for Protocol Conformance Tests (PCT). The Interoperability Tests (IOT) procedures to support AeroMACS based on current implementations is underway to support an overall certification for AeroMACS compliance in 2018.
The AeroMACS PKI Certificate Policy (CP) is complete and will be published to members in 2018. The WiMAX Forum, ICAO and key industry stakeholders collaborate in the oversight of AeroMACS PKI for the ecosystem in the AeroMACS Advisory Council (AAC). The WiMAX Forum has partnered with Eonti to manage and implement AeroMACS PKI as the Management Authority (MA). The MA is in the process of onboarding Certificate Authorities (CAs), to make AeroMACS PKI commercially available in 2018.

The Smart Energy Working Group (SEWG) will host the next conference call on Wednesday, September 26, 2018. As details concerning this meeting are finalized, we will be certain to keep you informed.

You can learn more about the Working Group activities by visiting the member’s workspace area to view the outcomes of recent Working Group sessions or join groups to receive emails related to that group’s activities. To find more information on our Working Groups, please visit: www.wimaxforum.org/Page/About/Working-Groups.

**Working Group activity is integral to the success of the Forum, and your participation is important to the WiMAX community!**

**WiMAX FORUM NEWS**

The WiMAX Forum weekly Newsbrief contains the summary of news from around the WiMAX ecosystem and is intended as a benefit to our community. If you do not yet receive the Newsbrief and wish to do so, please sign up here: WiMAX Newsbrief.
